Scientific Method

Habits of Mind:
- curious
- observant
- creative
- skeptical

Parts of an Experiment:
- Materials List
- Procedure
  - Variables = factors, components, elements of experiment that change.
  - independent = what I change
  - dependent = depends on what I change, is always what is being measured.
- Constants = factors, components, elements of experiment that stay the same.
- Control (group) = subject(s) that don't "experience the experiment," = don't participate.

Technology:
- product
- process
